

Bringing Dreams to Reality

Building Places™

Bring your vision to life by creating a schematic design and functional program for your project. An attraction that is comfortable and inviting to the community and visitors will grow through a melding of cultural realities and landscape character.

Take your vision to the next level by exploring how the building and its surroundings will function. Incorporate social, cultural and ecological priorities to achieve project sustainability with world class architecture.

The Features

- Preliminary
- Functional program
- Integrated team framework
- Confirm project scale, feasibility & quality
- On-site working session with nationally recognized Architect Stephen Cohlmeier

Physical Planning

- Explore through community involvement
- Integrate with community infrastructure
- Focus on cultural realities, landscape character and social integration
- Create a schematic design of how and its surroundings will function

Design Solutions

- Incorporate social, cultural and ecological priorities
- Clarify how the project integrates with the community
- Build on the community's vision

The Benefits

- Clarifies how project can be developed
- Provides a sense of project scale & character
- Establishes initial project cost framework
